Seed

The Asgrow and DEKALB brand seed performance edge comes from our leadership in research, breeding and technology. Monsanto invests over \$1 million every day in research around the globe, underlining our commitment to grower success. Our innovative research, genetics and product development capabilities provide opportunities for us to deliver a comprehensive package of seed that combines tremendous yield potential and consistent high quality with the traits you need to minimize risk in your field conditions and to maximize profit potential.

Please use the selection criteria below to find the Asgrow or DEKALB brand hybrids or varieties for your geography. You also have the option to go to a specific Asgrow or DEKALB brand hybrid or variety detail page by clicking on the drop-down menus at your right.
